**BY NILESH SARDA**

18+ Years of Trading Experience

Professional Trading Advisor

# Opening

---

*"It took me 5 years and 100+ failed strategies to realize one truth:*

*Most traders don't lose because they lack indicators — they lose because they lack rules."*

This ebook is not about tips, signals, or predictions. It is a **rule-based thinking framework** built from real market testing.

## What Makes This Ebook Different

**Built after 5 years, 100+ failed strategies, and real market testing** — this framework gives traders rules, not opinions so they can trade with clarity instead of guessing.

**Not signals. Not indicators.**  
A thinking framework for traders.

# Trader Pain Points (Real & Honest)

---

- I jump from indicator to indicator hoping the next one is "the edge."
- I overanalyze charts until I miss the trade completely.
- I don't know if my losses come from bad strategy or bad execution.
- I rely on Twitter, Telegram, or YouTube instead of my own rules.
- I hesitate on entries because nothing feels "confirmed enough."
- I take random trades and call it "discretion."
- I can't stay consistent because my strategy changes every week.
- I enter trades emotionally, then justify them logically after.
- I don't trust my system, so I break rules mid-trade.
- I feel busy studying markets but I'm not actually improving.

## The Real Problem

**The problem isn't the market.**

The problem is too much noise and no structure.

*Confusion doesn't come from complexity — it comes from a lack of rules.*

# How Rule-Based Trading Fixes This

---

Problem	Rule-Based Outcome
Confusion	Clear Yes/No conditions
Fear	Confidence from repetition
Inconsistency	Same rules every session
Overtrading	Defined no-trade zones
FOMO	Calm execution

## What This Ebook Helps You Do

- Stop chasing advisors & indicators
- Trade with defined entry, confirmation, and exit logic
- Reduce noise and focus only on what matters
- Know when NOT to trade
- Execute without second-guessing

# How to Use This Framework

1. **Choose ONE strategy**
2. **Follow rules exactly**
3. **Trade at least 30-50 trades**
4. **Track execution, not profit**
5. **Let data build confidence**

# The 6 Rule-Based Strategies

---

**IMPORTANT:** All strategies below are shared exactly as they are traded. No rules are modified. No logic is changed.

## Strategy Overview

1. **Strategy 1:** Commodity Intraday Trading
2. **Strategy 2:** Intraday Stock Future & Options
3. **Strategy 3:** Positional Index & Stock Options
4. **Strategy 4:** Intraday Index Options
5. **Strategy 5:** Scalping Method
6. **Strategy 6:** Long-Term Swing & Multibagger

Each strategy is designed to work independently. You don't need all six — you need the ONE that matches your time availability, capital, and trading personality.

# Strategy 1: Commodity

## Intraday

---

Zone-Based Trading System

 **Timeframe** 1-Hour Chart

 **Markets** MCX Commodities

 **Type** Intraday Breakout

### **Strategy Overview:**

This powerful commodity intraday strategy identifies high-probability trading opportunities using zone-based analysis. The system works on 1-hour charts and provides clear entry, exit, and risk management rules for commodities like Gold, Silver, Crude Oil, Copper, Natural Gas, and Zinc.

# Complete Strategy Rules

## 1a. Commodity Intraday Strategy

Hourly Chart Trading System - Complete Rules & Guidelines

### 📄 Strategy Overview

#### 🕒 Timeframe

This strategy works exclusively on 1-HOUR chart. Do not use on any other timeframe for accurate signals.

#### 🌐 Applicable Markets

All commodities including Crude Oil, Natural Gas, Gold, Silver, Copper, Zinc, etc.  
Works best during high liquidity hours.

#### 📊 Core Indicator

55-period Exponential Moving Average (EMA) on 1-Hour timeframe - Acts as trend filter and ultimate stoploss level.

### 📍 Zone-Based Trading System

#### 🟢 Green Zone (Bullish)

When price is trading ABOVE the 1H 50 EMA. Only BUY signals are valid in this zone. Look for buying opportunities only.

#### 🔴 Red Zone (Bearish)

When price is trading BELOW the 1H 50 EMA. Only SELL signals are valid in this zone. Look for selling opportunities only.

#### 📏 Entry Line - Bullish

Draw green horizontal line at the HIGHEST point of previous 2 candles. Entry point for BUY trades when price crosses above this line.

#### 📏 Entry Line - Bearish

Draw red horizontal line at the LOWEST point of previous 2 candles. Entry point for SELL trades when price crosses below this line.

### 📌 Signal Generation Rules

#### 🟢 BUY Signal Conditions (All Must Be Met)

- ✓ Price must be in GREEN ZONE (trading above 1H 50 EMA)
- ✓ Current candle's LOW must be LOWER than previous candle's LOW
- ✓ This is the FIRST signal since entering green zone OR since the line green entry line was last crossed
- ✓ Signal appears as green upward triangle below the candle with "BUY" text
- ✓ Line green entry line appears at the HIGH of previous 2 candles
- ✓ Blue circle appears at 1H 50 EMA level marking the ultimate stoploss

#### 🔴 SELL Signal Conditions (All Must Be Met)

- ✓ Price must be in RED ZONE (trading below 1H 50 EMA)
- ✓ Current candle's HIGH must be HIGHER than previous candle's HIGH
- ✓ This is the FIRST signal since entering red zone OR since the maroon entry line was last crossed
- ✓ Signal appears as red downward triangle above the candle with "SELL" text
- ✓ Maroon entry line appears at the LOW of previous 2 candles
- ✓ Blue circle appears at 1H 50 EMA level marking the ultimate stoploss

### 📌 Entry Execution Rules

#### For BUY Trades:

1. Wait for the green BUY arrow signal to appear on the chart
2. Entry is confirmed when price crosses ABOVE the line green entry line
3. Entry line is drawn at the maximum HIGH of the previous 2 candles
4. Only ONE signal is given per setup until the entry line is crossed
5. After entry line is crossed, system resets and can give new signals

#### For SELL Trades:

1. Wait for the red SELL arrow signal to appear on the chart
2. Entry is confirmed when price crosses BELOW the maroon entry line
3. Entry line is drawn at the minimum LOW of the previous 2 candles
4. Only ONE signal is given per setup until the entry line is crossed
5. After entry line is crossed, system resets and can give new signals

### 📌 Stoploss Management

#### 🔴 Ultimate Stoploss (Blue Circle Marker)

- For BUY trades, 1H 50 EMA level at the time of signal generation
- For SELL trades, 1H 50 EMA level at the time of signal generation
- This is a STRICT stoploss - exit the trade immediately if this level is hit
- The stoploss is marked with a blue circle on the chart for easy identification
- NEVER move your stoploss away from the 1H 50 EMA level

# 📖 How The Strategy Works

💡 Annotated Chart Showing Entry & Exit Signals

# 🔥 Live Trading Examples

📈 Example 1: Gold Futures

### Example 2: Silver Futures

### Example 3: Crude Oil Futures

# 🎯 Strategy 2: Intraday Stock Future & Options

Zone Signal Strategy with Trailing System

📊 **Timeframe** 15-Min Chart

💰 **Markets** NSE Stock Futures

⚡ **Type** Intraday Trending

## Strategy Overview:

This intraday strategy uses zone-based signals to identify high-probability trades in stock futures and options. Green arrows indicate BUY opportunities, while red arrows signal SELL trades. The strategy uses a trailing system with yellow line for profit maximization and includes fixed stoploss at entry for risk management.

# Complete Strategy Rules

# Zone Signals Strategy

Simple Rules for Maximum Profit

## Understanding the Signals

### GREEN ARROW

Chart shows uptrend - Ready for BUY signals

### RED ARROW

Chart shows downtrend - Ready for SELL signals

### How It Works

Arrow signals tell you market direction. Green = uptrend, Red = downtrend. Only take trades when price confirms by crossing the entry lines.

## BUY Signal Rules

### GREEN ARROW - THINK TO BUY

Your entry signal appears

#### 1 Entry Point:

Wait for price to cross above LIME GREEN LINE after the arrow appears

#### 2 Stoploss:

Previous candle LOW (at entry time)  
Keep it FIXED - Do NOT trail

#### 3 Exit Option 1:

If in PROFIT and close below BLUE LINE  
Exit to book profit

#### 4 Exit Option 2:

If price hits YELLOW LINE  
Exit immediately (maximum loss protection)

## SELL Signal Rules

### RED ARROW - THINK TO SELL

Your shorting signal appears

#### 1 Entry Point:

Wait for price to cross below MAROON LINE after the arrow appears

#### 2 Stoploss:

Previous candle HIGH (at entry time)  
Keep it FIXED - Do NOT trail

#### 3 Exit Option 1:

If in PROFIT and close above BLUE LINE

📈 Example 1: RVNL Futures

### Example 2: IRFC Futures

### Example 3: National Aluminium Futures

# Strategy 3: Positional Index & Stock Options

Zone-Based Positional Strategy with 4x Risk-Reward

 **Timeframe** 15-Min Chart

 **Markets** NSE Index & Stock Options

 **Type** Positional Swing

## Strategy Overview:

This positional strategy uses zone-based signals for Index and Stock options trading with a 4:1 risk-reward ratio. When green arrow appears in GREEN zone, buy ITM (In-The-Money) options or create 1:2 ratio spread strategies. Red arrows in RED zone signal selling opportunities. The strategy uses blue dot stoploss and targets 4 times the risk for maximum profitability.

# Complete Strategy Rules

# NSA Positional Strategy Guide

Simple Rules for Maximum Profit

## Understanding the Zones

### GREEN ZONE

Chart background turns GREEN - Ready for BUY signals

### RED ZONE

Chart background turns RED - Ready for SELL signals

### How It Works

The chart background color tells you the market direction. Green means uptrend, Red means downtrend. Only take BUY signals in GREEN zones and SELL signals in RED zones.

## BUY Signal Rules

### GREEN ARROW - THINK TO BUY

Your entry signal appears

**Entry Point:** Wait for price to cross above the **LIME GREEN LINE** after the arrow appears

**Stoploss:** Place stoploss at the **BLUE DOT** level (appears with arrow)

**Primary Target: 4 times your risk** (4x the distance between entry and stoploss)

**Exit Conditions:** Exit immediately if:

- Background color changes from GREEN to RED, OR
- Price touches the BLUE DOT stoploss level

## SELL Signal Rules

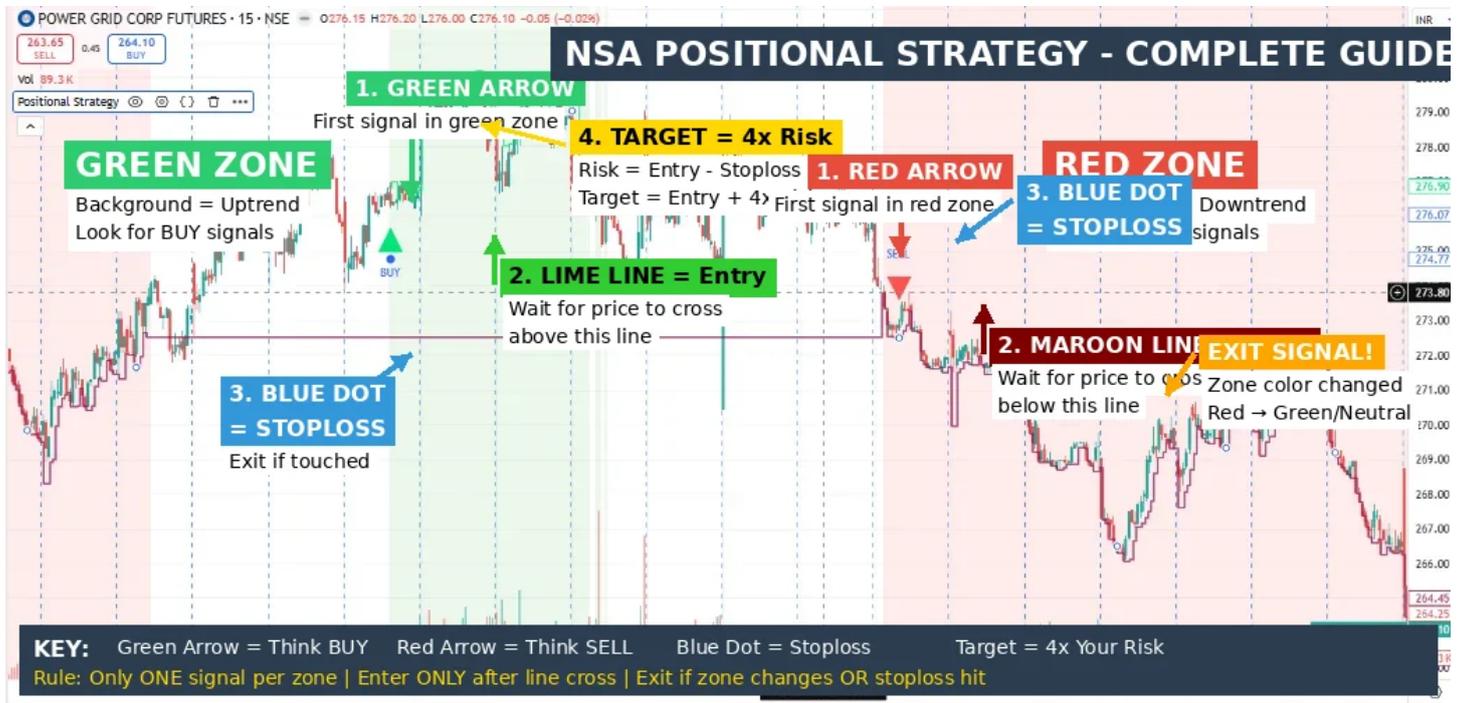

### RED ARROW - THINK TO SELL

Your shorting signal appears

**Entry Point:** Wait for price to cross below the **MAROON LINE** after the

# 🎯 Strategy 4: Intraday Index Options

Zone-Based Intraday System with ITM/OTM Selection

📊 **Timeframe** 1-Min Chart

💰 **Markets** NSE Index Options

⚡ **Type** Intraday Scalping

## Strategy Overview:

This intraday index options strategy uses zone-based signals with smart option selection. In GREEN zones, buy ITM (In-The-Money) options for lower risk. In RED zones, sell OTM (Out-of-The-Money) options. The strategy targets 3-4x risk-reward ratio with fixed stoploss at zone color changes. Use lime green line for buy entries and maroon line for sell entries.

# Complete Strategy Rules

# 14. INTRADAY STRATEGY - INDEX OPTIONS

Simple Visual Trading Guide | Follow the Colors, Follow the Signals

## 14. Understanding the Signals

**b** and **s** = **BEST ENTRY POINTS** - Primary signals for entering trades

**▲ Green Arrow** = Re-entry opportunity or profit booking alert (depends on zone color)

**▼ Red Arrow** = Re-entry opportunity or profit booking alert (depends on zone color)

## ● GREEN ZONE RULES

**b** Label Appears → **BEST BUY ENTRY POINT**

**Lime Green Line** → **BUY/ENTRY Level** when signal appears

**Maroon Line** → **STOPLOSS Level** for your buy position

**▲ Green Arrow**

### RE-ENTRY LEVEL

Second chance to buy if you missed 'b' label

**▼ Red Arrow**

### PROFIT BOOKING ALERT

Consider booking profits on your holding

## ● RED ZONE RULES

**s** Label Appears → **BEST SELL/SHORT ENTRY POINT**

**Maroon Line** → **SELL/SHORT Entry Level** when signal appears

**Lime Green Line** → **STOPLOSS Level** for your sell/short position

**▼ Red Arrow**

### RE-ENTRY LEVEL

Second chance to sell/short if you missed 's' label

**▲ Green Arrow**

### PROFIT BOOKING ALERT

Consider booking profits on your short position

## 📖 INDEX OPTIONS SELECTION GUIDE

### 🕒 FOR BUYING OPTIONS (Call/Put):

**Always use IN THE MONEY (ITM) Options**

- Better Delta value
- Lower time decay impact
- Higher probability of profit

### 🕒 FOR SELLING OPTIONS (Call/Put):

**Always use OUT OF THE MONEY (OTM) Options**

- Collect premium with lower risk
- Higher probability of expiring worthless
- Better risk-reward for sellers

# Strategy 5: Scalping Method

Zone-Based Swing Scalping with 1:2.5 Risk-Reward

 **Timeframe** 1-Min / 2-Min Chart

 **Markets** MCX Commodities

 **Type** Scalping

## Strategy Overview:

This scalping strategy uses zone-based signals with swing high/low entries for commodities. In GREEN zones (price above moving average), only BUY at swing high breakout. In RED zones (price below moving average), only SELL at swing low breakdown. The strategy uses opposite swing as stoploss and targets minimum 1:2.5 risk-reward ratio. Best trading hours: 9:00 AM to 11:30 AM IST.

# Complete Strategy Rules

# Scalping Method Strategy

## Strategy Overview

### Chart Timeframe

Use 1-Minute or 2-Minute chart for this scalping strategy.

### Applicable Markets

All commodities: Crude Oil, Natural Gas, Gold, Silver, Copper, etc.

### Best Trading Hours

High liquidity hours (9:00 AM to 11:30 AM IST) give best results.

## Understanding Trading Zones

### Green Zone (ONLY BUY Trades)

When price is above the moving average line.

This is the BUY-ONLY zone.

Do NOT take any SELL trades in Green Zone.

### Red Zone (ONLY SELL Trades)

When price is below the moving average line.

This is the SELL-ONLY zone.

Do NOT take any BUY trades in Red Zone.

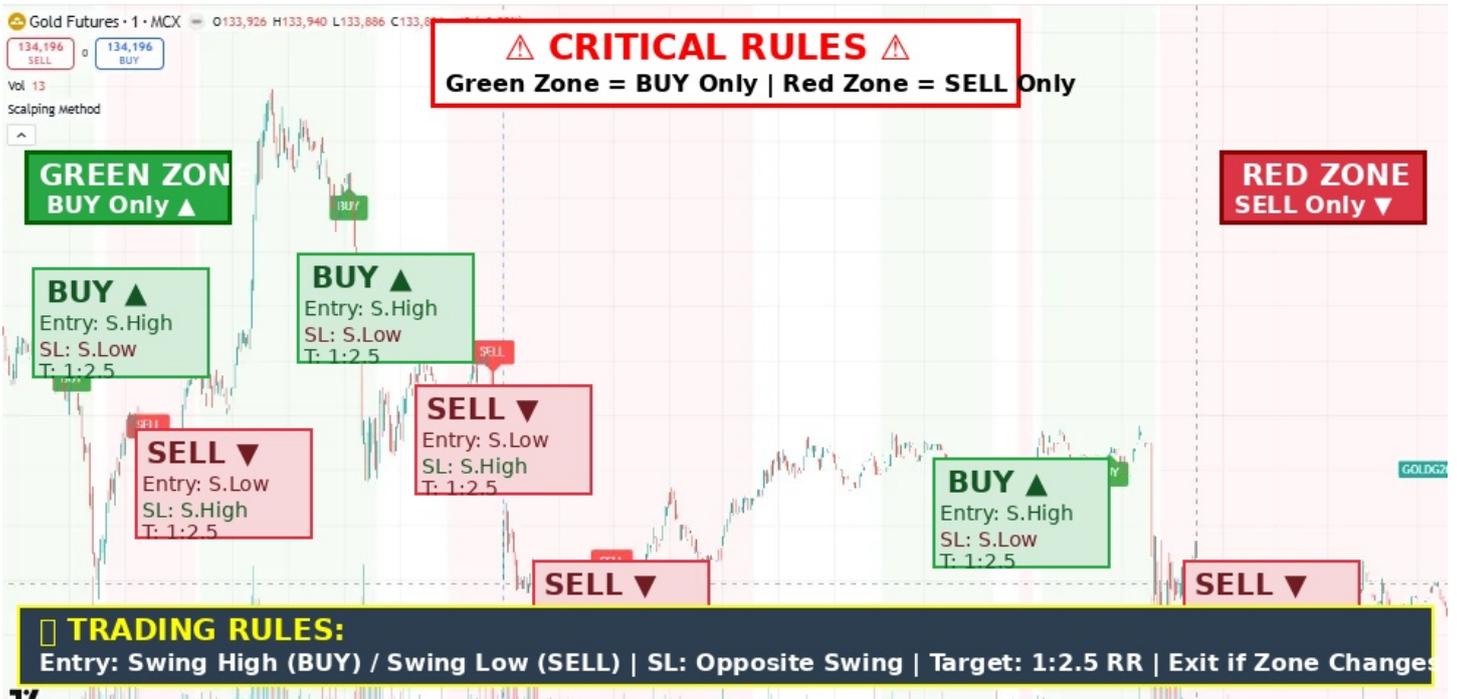

## BUY Trade Rules (Green Zone Only)

- ✓ Zone Check: Price MUST be in Green Zone (above MA)
- ✓ Entry Point: Enter at Swing High breakout
- ✓ Stoploss: Set at previous Swing Low
- ✓ Risk:Reward Ratio: Minimum 1:2.5  
Example: If Risk is 100 points, Target is 250 points
- ✓ Exit Rule: If zone changes to Red, exit immediately
- ✓ Direction: Only take BUY/LONG positions

## SELL Trade Rules (Red Zone Only)

- ✓ Zone Check: Price MUST be in Red Zone (below MA)
- ✓ Entry Point: Enter at Swing Low breakdown
- ✓ Stoploss: Set at previous Swing High
- ✓ Risk:Reward Ratio: Minimum 1:2.5  
Example: If Risk is 100 points, Target is 250 points
- ✓ Exit Rule: If zone changes to Green, exit immediately
- ✓ Direction: Only take SELL/SHORT positions

# 🎯 Strategy 6: Long-Term Swing & Multibagger

Red Line Trailing System for Swing & Long-Term Wealth

📊 **Timeframe** Daily / Weekly Chart

💰 **Markets** NSE Equity Stocks

⚡ **Type** Swing & Multibagger

## Strategy Overview:

This powerful strategy combines swing trading and long-term multibagger opportunities. For swing trades (5-15 days), enter on dots with yellow line trailing. For multibagger stocks (10-20 days hold, 100%+ targets), enter on green arrows near dots with RED LINE trailing only. Never use yellow line for multibaggers. The strategy works for both long and short positions based on zone colors.

# Complete Strategy Rules

# पावर ज़ोन खरीदारी रणनीति

सरल और स्पष्ट प्रणाली → सोचें → एंट्री → निष्पादित करें

## 🎯 सिग्नल को समझें

### ↑ हरा तीर (↑)

खरीदने के बारे में सोचें! बाजार तेजी की गति दिखा रहा है। लॉन्ग पोजीशन के लिए तैयार हो जाएं - लेकिन पुष्टि की प्रतीक्षा करें।

### ● हरा बिंदु (एंट्री पुष्टि लाइन)

— पीली रेखा (ट्रेल स्टॉपलॉस / लक्ष्य)

— लाल रेखा (दीर्घकालिक समर्थन)

## ⚡ अल्पकालिक खरीदारी रणनीति

### एंट्री के दो तरीके

#### 1 आक्रामक एंट्री (हरा बिंदु ब्रेकआउट)

- ▶ प्रतीक्षा करें: हरा तीर दिखाई देता है
- ▶ एंट्री: जब कीमत **हरे बिंदु** रेखा से ऊपर क्रॉस करे
- ▶ स्टॉपलॉस: पिछले दिन की निम्नतम कीमत पर रखें
- ▶ लक्ष्य: आपके जोखिम का 4 गुना या **पीली रेखा** के साथ ट्रेल करें

🔥 यह तेज़ एंट्री है लेकिन हरे बिंदु के टूटने पर त्वरित कार्रवाई की आवश्यकता है

#### 2 रूढ़िवादी एंट्री (स्विंग हाई ब्रेकआउट)

- ▶ प्रतीक्षा करें: हरा तीर दिखाई देता है
- ▶ एंट्री: कीमत स्विंग हाई (हरे तीर के बाद उच्चतम बिंदु) से ऊपर क्रॉस करने के बाद खरीदें
- ▶ स्टॉपलॉस: पिछले दिन की निम्नतम कीमत पर रखें
- ▶ लक्ष्य: आपके जोखिम का 4 गुना या **पीली रेखा** के साथ ट्रेल करें

🔥 अधिक पुष्टि लेकिन एंट्री कीमत थोड़ी अधिक हो सकती है

### 🚀 मल्टीबैगर सेटअप (दीर्घकालिक होल्ड)

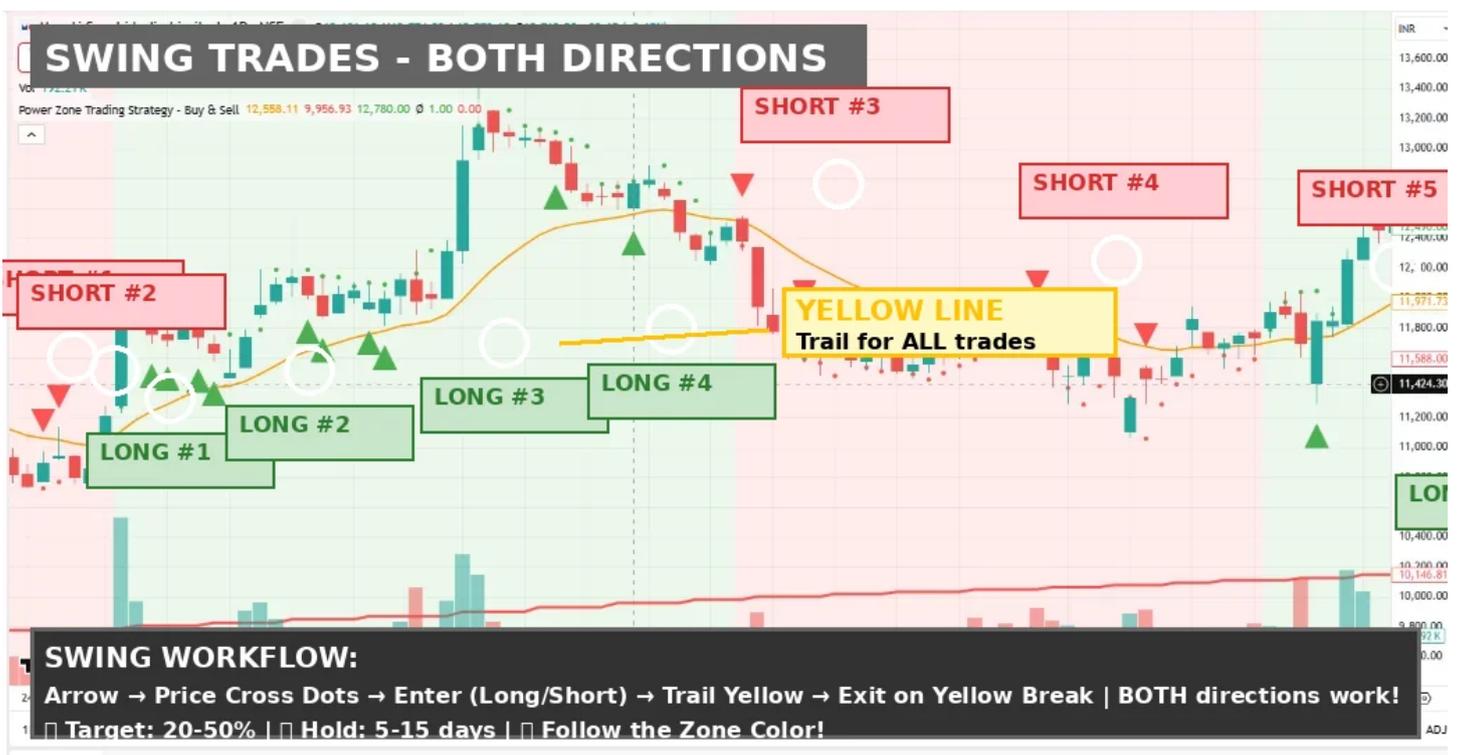

#### भरफेक्ट एंट्री शर्त:

- ▶ पदल **↑ हरा तीर** दिखाई देता है

# Additional Strategy Examples

---

*Here are more real-world strategy implementations to give you deeper insights into rule-based trading approaches.*

The following examples demonstrate how different market conditions and timeframes require specific rule sets. Study these to understand the versatility of systematic trading.

# THE GREEN ARROW STRATEGY REVEALED!

---

## One Simple Rule = Massive Profits

### ⚡ THE GOLDEN RULE ⚡

GREEN ARROW ▲ appears in the FIRST HOUR?

✅ TAKE THE TRADE!

GREEN ARROW ▲ appears AFTER FIRST HOUR?

❌ DON'T TOUCH IT!

Watch for GREEN ARROW ▲ in FUTURES or CASH STOCK — That's Your Entry Signal!

### LAW OF PROBABILITY

When You LOSE, You Lose SMALL

When You WIN, You Win BIG

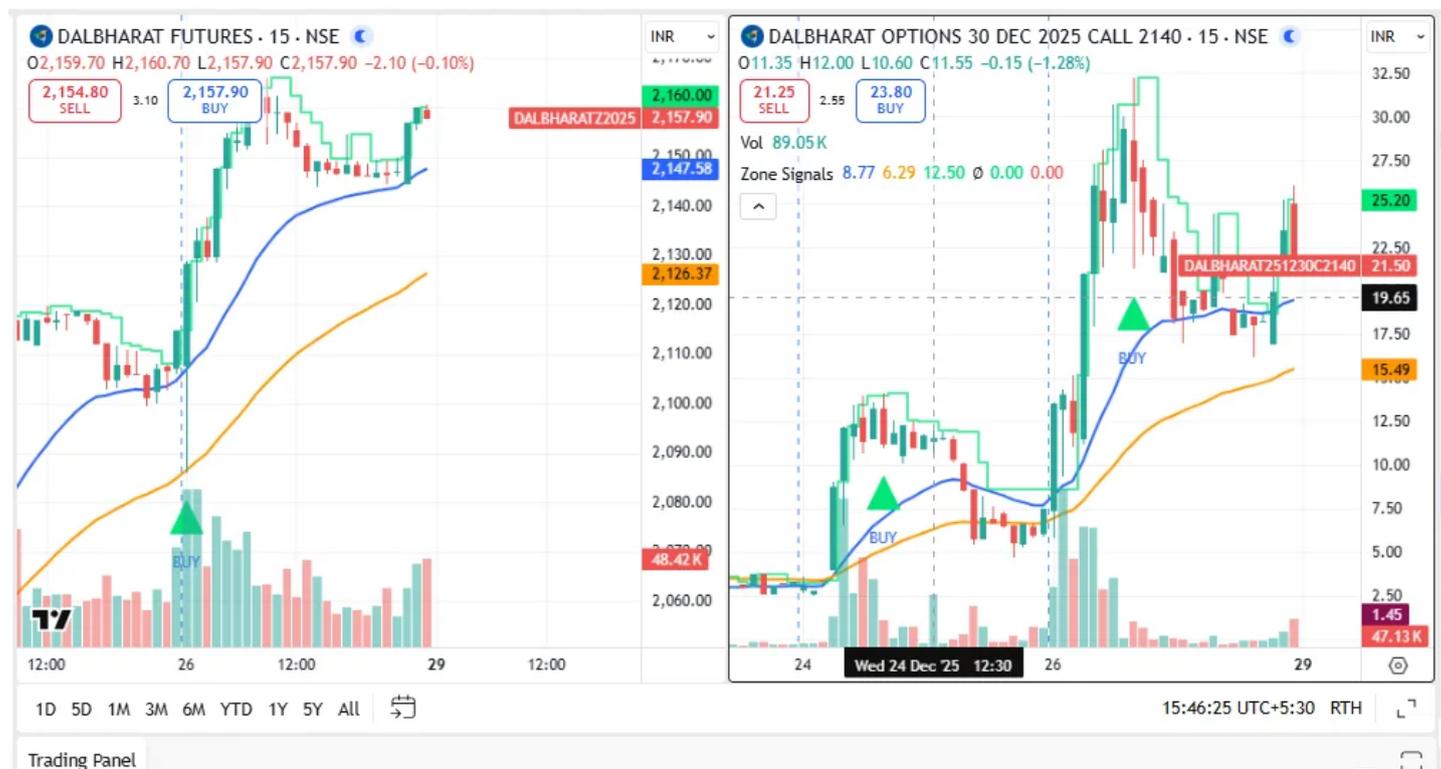

## This Is The ONLY Strategy You Need For Stock Options!

### DALBHARAT

₹7 → ₹30

 329% PROFIT!

GREEN ARROW ▲ showed up in the FIRST HOUR on the futures chart. We entered the option trade immediately. Result? Over 3X returns in a single session! This is what happens when you follow the rules.

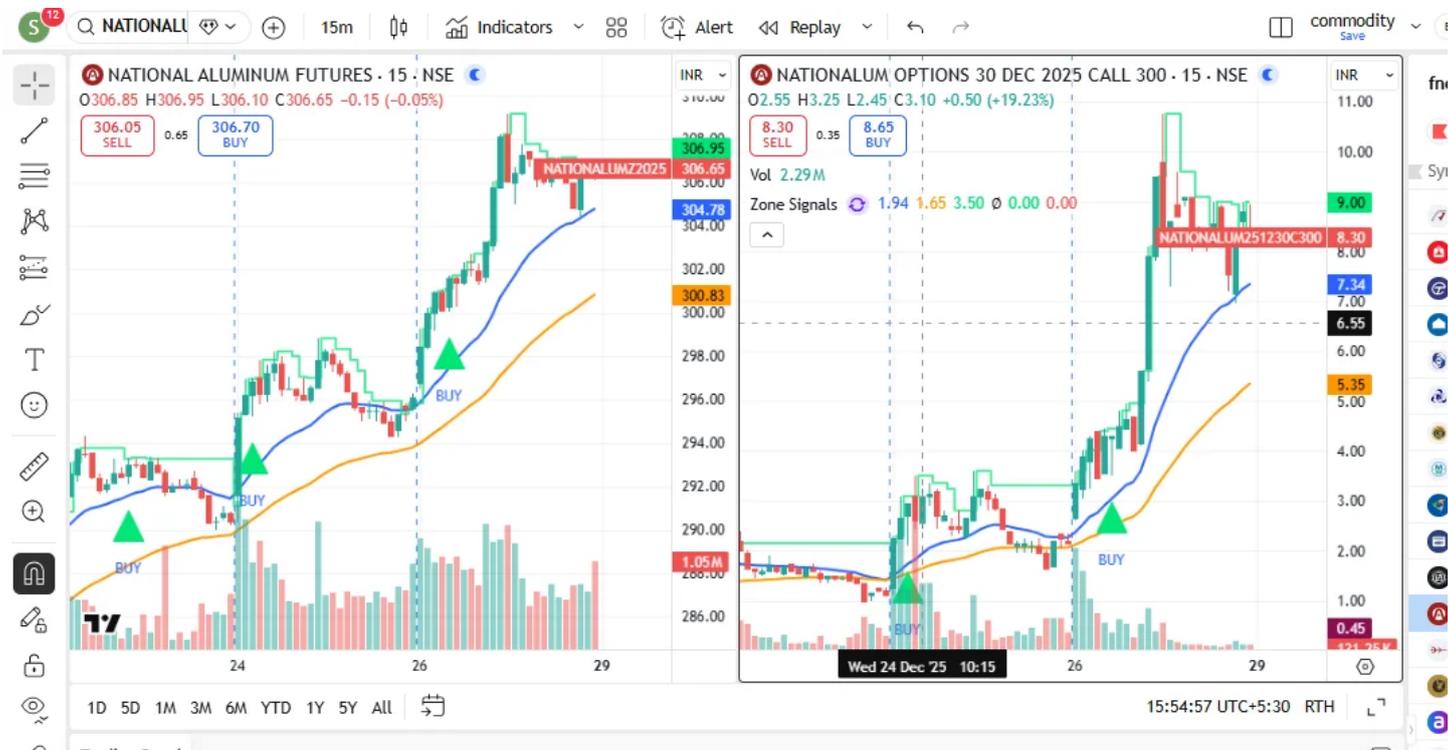

## NATIONAL ALUMINUM

₹4 → ₹11

🚀 175% PROFIT!

GREEN ARROW ▲ flashed within the first hour. Clean entry, clean exit. The cash stock confirmed the signal, we hit the option hard. Result? 175% gain. No guessing, no indicators — just the arrow!

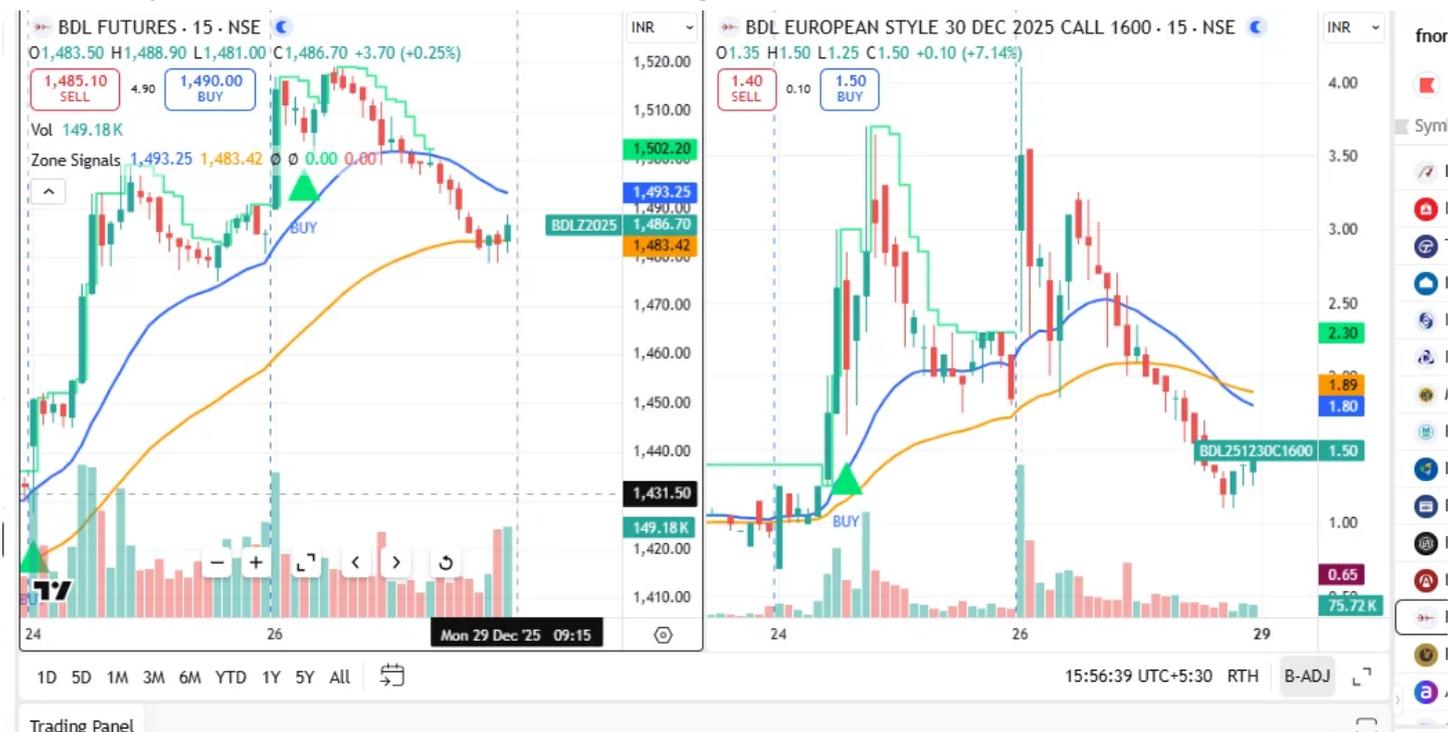

## BDL

₹2.5 → ₹1.25

📉 50% Loss (CONTROLLED)

Not every trade is a winner — and that's OKAY! This is where the Law of Probability protects you. We lost 50%, but look at our winners: 329% and 175%! One big win wipes out multiple small losses. This is risk management in action!

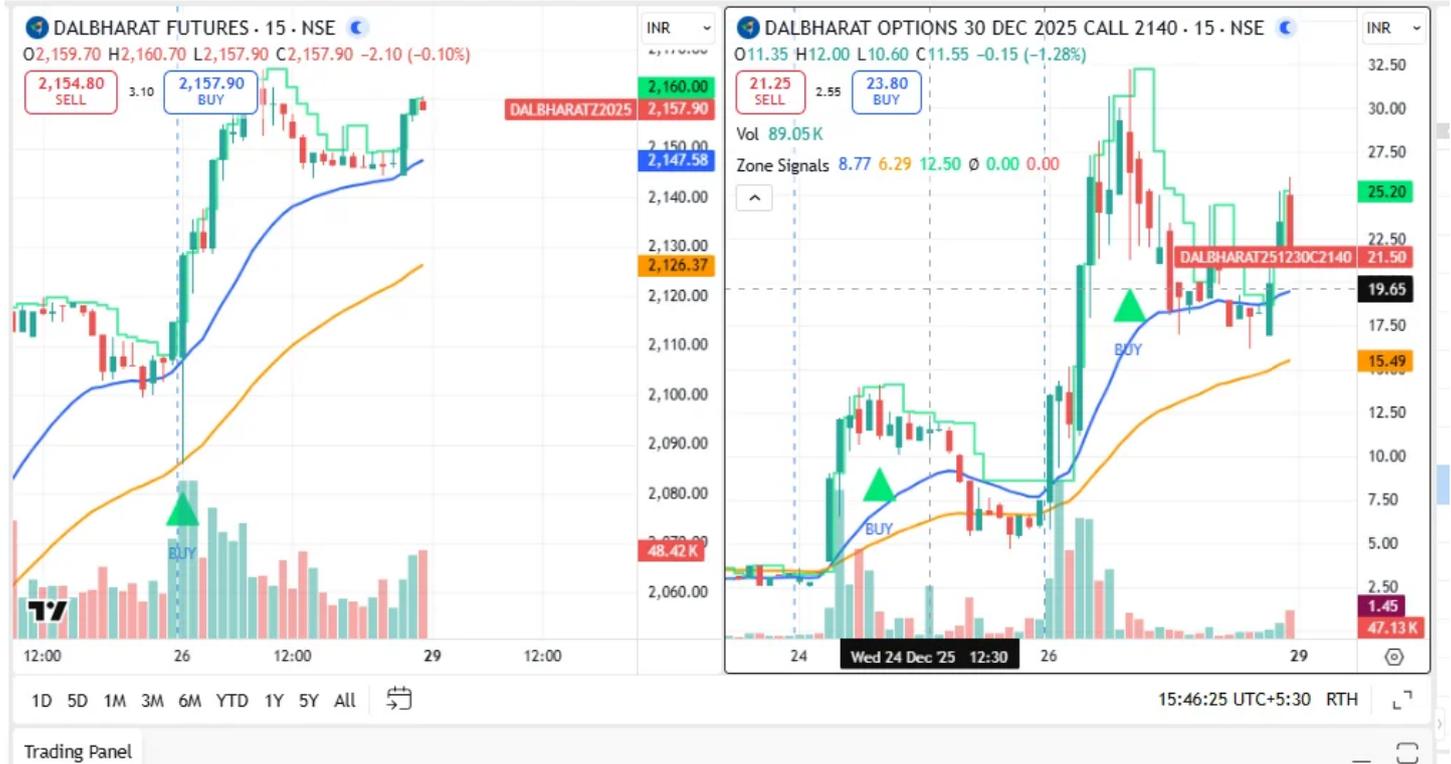

# CONCOR

₹7 → ₹10

🚀 43% PROFIT!

Another GREEN ARROW ▲ signal in the first hour. Took the trade without hesitation. 43% profit banked! Small gains add up, and when combined with our big winners, the account grows consistently. No complex analysis needed!

## 🎯 THE BOTTOM LINE

3 Winners + 1 Loser = MASSIVE NET  
PROFIT

$$(329\% + 175\% + 43\%) - 50\% = 497\%$$

TOTAL GAIN!

Stop Chasing 1000 Indicators. Follow  
The GREEN ARROW ▲. Win Big. Lose  
Small. It's That Simple!

# **LOW RISK EQUITY CASH INTRADAY TRADING**

Master the Art of Safe & Profitable Intraday Trading

## **PROVEN MONEY-MAKING STRATEGY FOR CONSERVATIVE TRADERS**

Trade smart, minimize risk, and capture consistent profits with  
our scientifically proven 3-step system!

# THE 3-STEP SUCCESS FORMULA

1

 SELECT NIFTY 500 STOCKS

Start with the universe of Nifty 500 stocks - India's most liquid and stable companies. Focus on quality to minimize risk.

2

 TRADE TOP 30-40 GAINERS

Filter and trade only in the top 30-40 stocks showing strong momentum and volume. Ride the market leaders!

3

 FOLLOW THE GREEN ARROW SYSTEM

 **Look for GREEN ARROW**

**Buy on crossing GREEN LINE**

 **Ultimate SL: ORANGE LINE**

**Small SL: Previous Candle Low**

## KEY TRADING INDICATORS

 GREEN ARROW = Entry Signal

 GREEN LINE = Buy Trigger

 ORANGE LINE = Ultimate Stop Loss

 Previous Candle Low = Tight SL

# WHY THIS STRATEGY WORKS FOR LOW RISK TAKERS

- ✓ **Clear Entry Signals:** No confusion - Green arrow tells you exactly when to enter
- ✓ **Defined Risk:** Orange line gives ultimate stop loss, previous candle low for tight control
- ✓ **Quality Stocks:** Trade only in Nifty 500 - liquid, established companies
- ✓ **Momentum Based:** Ride the winners - top 30-40 gainers with strong momentum
- ✓ **Visual Clarity:** Simple color-coded system - even beginners can follow
- ✓ **Capital Preservation:** Small stop losses protect your capital

## EXECUTION TIPS FOR MAXIMUM SUCCESS

- ◆ **Wait for Confirmation:** Don't jump in early - wait for price to cross green line

- ◆ **Volume Matters:** Ensure good volume on the breakout candle
- ◆ **Set Stop Loss Immediately:** Place your SL at orange line as soon as you enter
- ◆ **Follow the System:** Don't override signals with emotions or guesswork
- ◆ **Position Sizing:** Risk only 1-2% of capital per trade
- ◆ **Exit Discipline:** Book profits at reasonable targets, don't get greedy
- ◆ **Track Your Trades:** Maintain a trading journal to improve over time
